

The Road Never Ends

I've been looking down this winding road
From January through December
Growing up along the way
Forgetting more than I remember

Miles and miles between us both
The thought of you keeps me together
Torn between the road and you
Keeps going on, feels like forever

Sometimes it seems like the road never ends
Playing my part, tomorrow again

When I'm with you,

We've endured the test of time
And my heart is in your hands
It's not easy, yes I know
When it's so hard to understand

Sometimes it seems like the road never ends
Playing my part, tomorrow again
Till I'm with you

Till I'm with you (modulate up one step)

Yes, sometimes it seems the road never ends
Playing my part, tomorrow again
Till I'm with you

Sometimes it seems the road never ends
Playing my part, tomorrow again
Till I'm with you

Playing my part, tomorrow again
till I'm with you
