

Yours What A Love Needs

You sat right next to me, we got along
I felt no nervousness to be by your side
You really couldn't tell, I didn't let you know
There would be so much more to hide
You're — what a love needs
When September rains, (BGV)
you're why a heart bleeds
From December pain
When it happens to you
in the wintertime (Female Background vocals)
You'll know that it's true,
you won't believe your mind (Female Background vocals)
Just listen to me
on your coldest night (Female Background vocals)
I wouldn't lie to you
when the storm blows through (Female Background vocals)
You're what a love needs
like the sky is blue (Female Background vocals)
You're what a love needs
There was a change in me that came from you
I let you in my soul, and filled your heart with mine
I saw you changing too, there now was love in you
I tend to lift, to fly so free
You're what a love needs
When September rains, (Female Background vocals)
you're what a love needs
from December pain (Female Background vocals)
When it happens to you
in the wintertime (Female Background vocals)
You'll know that it's true
You won't believe your mind (Female Background vocals)
Just listen to me
on your coldest night (Female Background vocals)

I wouldn't lie to you
when the storm blows through (Female Background vocals)
You'll wanna love me
like the sky is blue (Female Background vocals)
You're what a love needs
